PROFESIONAL SUMMARY AND OBJECTIVE

I am a full stack Web developer with 1+ years of experience in the development, usage and implementation of data driven web applications. I have knowledge of languages and technologies such as PHP, JavaScript, MySQL, HTML, CSS, JQuery, Bootstrap etc.

I am enthusiastic about software development, community development and also am a fast learner and harness my ability to quickly master and apply new knowledge.

My objective is to secure a challenging position where my skills and experiences will be fully utilized to speed up and contribute tremendously to the growth of the organization, community and teams I work with, and to add more values to myself, people around me and the whole world at large.

WORK HISTORY

Computer Tutor

Feb 2018– Oct 2018

C-TECH International LTD Enugu, Nigeria

Responsibilities as a Computer Tutor:

Taught my students how to use the computer, starting from how to boot a computer to relationships, connections and uses of the computer and its peripherals.

I also taught them how to work with basic programs such as Microsoft offices, paint, CorelDraw and more.

For student who have the above knowledge I go further to educate them on more advanced courses like HTML, CSS, JavaScript and more.

ACCOMPLISHMENT
