PERSONAL PROFILE

I am a full stack Web developer with 3+ years of experience in the development, usage and implementation of data driven web applications. I have knowledge of languages and technologies such as PHP, JavaScript, Node JS, React, MySQL, HTML, CSS, J Query, AJAX, Express, Bootstrap etc.

I am enthusiastic about software development, community development and also am a fast learner and harness my ability to quickly share, master and apply new knowledge.

MY OBJECTIVE

My objective is to secure a challenging position where my skills and experiences will be fully utilized to speed up and contribute tremendously to the growth of the organization, community and teams I work with, and to add more values to myself, people around me and the whole world at large.

WORK EXPERIENCE

Software Engineer
Geneus Interactive Technologies | April 2019 - present

- Worked on several projects with my team such as development of personal/organisation websites, e-commerce websites, brand websites, management systems and many more.

Programming/Basic Computer Training Instructor
C-TECH International LTD |Oct 2017– Aug 2018

- Taught my students how to use the computer, starting from how to boot a computer to relationships, connections and uses of the computer and its peripherals.
- I also taught them how to work with basic programs such as Microsoft offices, paint, CorelDraw and more.
- For student who have the above knowledge I go further to educate them on more advanced courses like HTML and CSS.
